GAGGENAU

Flex induction cooktop with integrated ventilation system 200 series

80 cm

CV282111

Sturdy stainless steel frame

Flex function for combining the rectangular cooking areas

Flexible positioning of cookware inside combined cooking areas

Highly efficient ventilation system integrated in the cooktop

Fully automatic ventilation system functions

Large-scale metal grease filter, easy to remove, dishwasher-safe

Energy-saving, low-noise fan

Air extraction or air recirculation system

Integrated activated charcoal filter easily removeable from above for air recirculation system

Twist-Pad control with removable magnetic knob

Easy control of all functions with bicoloured display

Cooking zones

2 flex induction cooking areas 23x19 cm (2200 W, with booster 3700 W), linked together 23x38 cm (3300 W, with booster 3700 W).

2 flex induction cooking areas 23x19 cm (2200 W, with booster 3700 W), linked together 23x38 cm (3300 W, with booster 3700 W).

Performance of ventilation system

Performance and noise level, output level 3/Intensive:

Air output according to EN 61591. Sound power level according to EN 60704-3. Odour reduction for air recirculation in accordance with EN 61591.

Air extraction:

532 / 636m³/h.

70 / 74 dB (A) re 1 pW.

Air recirculation:

487 / 611m³/h.

67 / 72 dB (A) re 1 pW.

Handling

Twist-Pad control with removable magnetic knob.

User friendly control with bicoloured display (white / orange).

Cooking zone and cooking area marking.

Electronic power control in 17 output levels.

Control of ventilation system with 3 electronically controlled power levels and 1 intensive mode.

Features

Flex function for rectangular cooking areas.

Automatic pot detection when the cooktop is switched on.

Professional cooking function.

Cooking sensor function (in use with cooking sensor CA 060 300).

Frying sensor function.

Booster function for pots.

Booster function for pans.

Keep warm function.

Automatic sensor-controlled performance adjustment of the ventilation system.

Automatic activation of the ventilation system when a cooking zone is used.

Interval ventilation, 6 min.

Automatic sensor-controlled or manual run-on function.

Grease filter and activated charcoal filter saturation indicator.

Removable, dishwasher-safe grease filter unit.

High-grade black zinc die-casted cover for ventilation system, dishwasher-safe.

Fan technology with highly efficient, brushless DC motor (BLDC).

Airflow-optimised interior for efficient air circulation.

Stopwatch.

Cooking timer for up to 99 minutes.

Short-term timer.

Memory function.

Options menu.

Power management.

Selected digital services (Home Connect)

Remote control and monitoring of ventilation.

Remote monitoring of cooking zones.

Remote diagnostics.

Home network integration for digital services (Home Connect) wireless via WiFi.

The use of the Home Connect functionality depends on the Home Connect services, which are not available in every country. For further information please check: home-connect.com.

Consumption data

Energy efficiency class A at a range of energy efficiency classes from A+++ to D.

Energy consumption 56.9 kWh/year.

Ventilation efficiency class A.

Illumination efficiency class -.

Grease filter efficiency class B.

Sound level min. 61 dB / max. 70 dB normal mode.

Safety

Main switch.

Operation indicator.

Pot detection.

2-stage residual heat indication.

Child lock.

Safety shut-off.

Detachable, dishwasher-safe two-stage overflow protection.

Removable overflow container, 0,9-litre capacity, dishwasher-safe.

Planning notes

Bottom cabinet width: min. 60 cm.

Worktop depth: min. 60 cm with unducted recirculation, min. 65 cm with ducted recirculation/extraction.

Immersion depth 223 mm.

The unducted recirculation set CA 082 011 requires a vertical aperture of min. 25 mm behind the backpanel of the furniture. Suggested for ideal performance are 50 mm.

The air outlet on the backside of the appliance can directly be accessed with a flat duct element (DN 150).

In air extraction mode a one-way flap with a maximum opening pressure of 65 Pa should be installed.

For optimum performance in air recirculation we recommend an outflow surface area of at least 400 cm².

Operates with magnetic (induction) iron pots and pans only. For an optimal heat distribution, the use of sandwich bottom cookware is recommended.

Special accessories (order as spare parts):

Part No. 17006018 Frying sensor pan, ø 20 cm

The equivalent ducting length to ensure good performance is Lmax 28 m.

Appliance must be fixed from underneath.

Appliance weight: approx. 28 kg.

The appliance must be freely accessible from below.

When installing a ventilation hood with air extraction mode and a chimney-vented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.

The bearing capacity and stability, in the case of thinner worktops in particular, must be supported using suitable substructures. Take into account the appliance weight and additional loads.

Comply with the clearances from underneath the worktop to the overflow container: min. 300 mm to remove and empty the container.

Connection

Total connected load 7.4 KW.

Connecting cable 1.50 m without plug.

Power consumption standby/display off 0.5 W.

Power consumption standby/network 2.0 W.

Please check the user manual for how to switch off the WiFi module.

Side view with kit ducted air recirculation 600 mm worktop depth;
surface-mounted

Not recommended for non-thermally insulated outer wall or floor ($U \geq 0.5 \text{ W/m}^2\text{K}$)
