## Not included accessories

#### GTP

Partially extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they quarantee stability and facilitate the smooth extraction of the trays.

### BN620-1

Enamelled tray suitable for 45cm and 60cm ovens. Depth 20 mm. Perfect for a wide range of savoury and sweet baking.

### BN640

Enamelled tray suitable for 45cm and 60cm ovens. Depth 540 mm. Perfect for cooking and roasting meat and fish in sauces. Also ideal for experimenting with lighter and crunchy side dishes

#### PR3845X

Antifingerprint stainless steel. Cover for furniture in column installation of more ovens

### GTT

Totally extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

# Symbols glossary (TT)

$\sim$	1

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Air cooling system: to ensure a safe surface

A D

R

temperatures.

Electric

Fresh Touch: Most of Smeg ovens have a "cool door." Thanks to the combination of tangential
cooling and internal heat-reflecting glasses, the temperature on the outer surface of the door is maintained below 50° C. In addition to providing
safety, this system protects the sides of the furniture from overheating by the oven.

Static: Traditional cooking suitable for the preparation of one dish at a time. The fan is not active and the heat comes from below and from above at the same time. Static cooking is slower and more delicate, ideal in order to get well cooked and dry dishes even inside. Ideal for cooking all types of roasts, fatty meats, bread, filled cakes.

Circulaire: it is the perfect function for cooking all types of dishes in a more delicate way. The heat comes from the back of the oven and is distributed quickly and evenly The fan is active. It is also ideal for cooking on multiple levels without mixing smells and flavors.

Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes. Quadruple glazed: Number of glazed doors. Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 ° C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking

Fan assisted: Intense and homogeneous traditional cooking, also suitable for complex recipes. The fan is active and the heat comes from below and from above at the same time. Ventilated cooking ensures a faster and more homogeneous result, leaving fragrant foods outside and moister inside. Ideal for baked pasta, biscuits, roasts and cobblers.

Base: the heat comes only from the bottom of the cavity. The fan is not active. Ideal for sweet and savory pies, cobblers and pizzas. Designed to complete cooking and make food more crunchy This symbol in gas ovens indicates the gas burner.

ECO: low energy consumption cooking: this function is particularly suitable for cooking on a single shelf with low energy consumption. It is recommended for all types of food except those that can generate a lot of moisture (for example vegetables). To achieve maximum energy savings and reduce time, it is recommended to put the food in the oven without preheating the cooking compartment

Fan grill: very intense heat coming only from above from a double heating element The fan is active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat.

SMEG SPA

# •se•smeg

٢	Pizza function: Specific function for cooking pizza in a pan. It allows to obtain a pizza that is soft inside and crispy outside with the topping perfectly cooked, not dry and not burnt.		Turbo: the heat comes from 3 directions: above, below and from the back of the oven The fan is active. It allows quick cooking, even on several shelves without mixing the aromas. Ideal for large volumes or foods that require intense cooking.
且	All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.	Ŀ	The inner door glass: can be removed with a few quick movements for cleaning.
ین ج	Side lights: Two opposing side lights increase visibility inside the oven.	P	PYROLYSIS - AUTOMATIC CLEANING FUNCTION: the oven heats up to a temperature approaching 500 ° C and chars grease and food residues into a fine ash that can be easily wiped off with a damp cloth. At such a high temperature, the door locks automatically for safety, while the temperature of the door remains controlled so it is safe to touch User adjustable function based on the level of dirt present in the oven.
٢	Pizza function: Some ovens have an exclusive "Pizza" function which provides direct contact of the refractory stone for cooking pizza with low heating element. This allows cooking pizza in just 3 - 5 minutes, depending on the filling. This function is also ideal for cooking pies, baked fish and vegetables.	<u>-</u>	Rapid preheating: cooking is preceded by the preheating phase which allows the cooking compartment to reach the set temperature. This option reduces the time by up to 50%.
<u>.5</u>	The oven cavity has 5 different cooking levels.	D	Soft close: all models are equipped with advanced function of smooth closing of the door, which allows the device to close smoothly and quietly.
	Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.	ŝ	Electronic control: Allows you to maintain temperature inside the oven with the precision 2- 3 ° C. This enables to cook meals that are very sensitive to temperature changes, such as cakes, souffles, puddings.
65 It	The capacity indicates the amount of usable space in the oven cavity in litres.
