

NoFrost With Style And Elegance

Quality, Design and Innovation

SGNef 3036

LIEBHERR

SmartSteel: With SmartSteel used on the appliance door the visibility of fingerprints is reduced, making it very easy to clean. Maintain this beautiful door exterior simply with a wipe of a clean, dry or damp cloth.

Touch control system: Our intuitive electronic touch control panel ensures all functions are easy and convenient to use as well as guarantees that the settings selected remain accurate and constant.

SuperFrost: The automatic SuperFrost function reduces the temperature in your freezer to as low as -32°C (switching back to normal operation once it has reached -32°C). By activating prior to grocery shopping it will reduce the likelihood that existing items will suffer from excessive temperature rise while the door is left open for loading or temperature transfer from added warmer items.

Note: Whilst every effort is made to ensure all specifications and information in this flyer are accurate, Liebherr reserves the right to make changes without notification. Where actual appliance measurements, specifications, and ratings are crucial, we recommend that the actual appliance installation instructions that accompany each appliance be checked. Liebherr will not be liable for any loss.

Liebherr's **SGNef 3036** freezer includes 8 transparent FrostSafe freezer drawers, offering ample space for storage when it comes to buying in bulk or freezing leftover.

With FrostSafe, the freezer drawer compartments are closed all round. This means that cold air cannot dissipate as quickly when the door is opened, maintaining the air temperature and ensuring high levels of efficiency. The transparent front of the compartments provides a clear view of the frozen items, so that drawers do not need to be opened as long.

It is important to note that if pairing with another model it will only match the **SKef 4260** fridge.
